

TTW (Through-The-Wall)

Providing 24/7 accessibility
for all your financial needs

- The Genmega Through-the-Wall Kiosk (TTW Kiosk) is the perfect solution for 24/7 weatherized access to your financial software solution. With the look of a financial institution ATM, but with the flexibility and customization that have made Genmega Kiosks successful, the TTW Kiosk is a great way to get your application out in the areas it needs most, and in a look that will give your customers confidence.
- Standard interface components, include a 15" touch screen, EMV card reader, 3" receipt printer, and PCI-certified keypad that all allow for a compliant and tested financial transaction environment. In addition, the TTW Kiosk can add a bill acceptor, a check scanner, a barcode scanner, or other components to create the complete solution that you need for your application.
