

# Universal Kiosk 1

## The Original Multi-Purpose Financial Kiosk

➤ The Genmega Universal Kiosk is the perfect platform to present your custom Self-Service application. It features a modern profile and includes a large 21.5" vertical touch-screen to attract attention and help you provide a unique interface to your customers.

➤ Standard interface components include a card reader, 3" receipt printer and PCI-certified keypad useful for a variety of financial transactions. Universal Kiosk can be configured with bill acceptors, check imager, barcode scanners, cash dispenser, fingerprint scanner, and more options. We can also help to intergrate most any custom components your application may require.
