for advanced financial needs

➤ Based on the popular Genmega Universal Kiosk, the new UK XL model is built on a new larger chassis which allows flexibly to integrate even more devices and options suited to your transaction solution. Continuing with the modern eye-catching design of the UK, the XL version includes a large 21.5" vertical touch-screen to attract attention and provide a unique interface to your customers.

➤ This XL chassis can support wider array of components including a 4 cassette cash dispenser, a bulk-type bill acceptor, and coin dispensers in addition to the standard interface devices including an EMV card reader, 3" receipt printer and PCI certified keypad, all useful for a variety of financial transactions. The XL can also be fitted with a barcode scanner, check scanner, fingerprint scanner among a host of other possibilities.
